Heritors Labs LLC

CAPABILITY STATEMENT

FROM BOLD IDEAS TO WORKING SYSTEMS

Heritors Labs LLC is a Houston-headquartered innovation, advisory, and technology firm. We help public institutions, research organizations, and enterprises turn policy priorities and evidence into implementation plans, commercialization pathways, operating models, and working digital platforms.

Core capabilities
- Policy, innovation, and digital transformation strategy
- Research, intelligence, and ecosystem mapping
- Innovation commercialization and market activation
- Institutional and enterprise transformation
- Custom software, platforms, web, UX, and QA
- AI strategy, governance, and applied intelligence

Why Heritors Labs
- Connected delivery from policy and research to implementation and technology
- Houston headquarters with international and African-market experience
- Evidence-led methods, clear deliverables, and decision support
- Advisory outputs and functional digital systems from one team
- Lean core supported by a multidisciplinary consultant network

Selected experience

Engagement	Scope and evidence
National digital transformation	Principal architecture for a 12-pillar national blueprint later referenced in World Bank appraisal materials for a US$200 million project context.
FCDO-backed innovation portfolio	Research commercialization, ecosystem engagement, frameworks, and capacity building across an approximately US$1.4 million combined portfolio.
Responsible AI guidance	Authored and designed Ghana's AI Practitioners' Guide under GIZ FAIR Forward II, published in September 2025.
Technology and platform delivery	Cloud platforms, web and mobile products, workflow design, UX review, software QA, and implementation support.
